2001-2002 SCHOOL YEAR

STATE: MT - MONTANA

COMMENTS

In the 2001-02 school year, Montana changed the way special education personnel data were collected. In prior years, the collection was in conjunction with child count, and reported by school district special education personnel. In 2001-02, the process was integrated into a larger data collection process that collects data for purposes of accreditation. Because of a change to the data collection process, several additional validation checks were performed to ensure the accuracy of the data. The process included validation reports sent to school districts to verify the data submitted as well as follow-up phone calls to school districts in which discrepancies were noted between current data and data reported the previous year. These efforts resulted in several corrections and additions to the original data set reported to Westat dated November 1, 2002..

Section C, Row 15 (SEA Supervisors/Administrators) - In the past it was assumed this data count was for personnel that might administer at a school that was taken over by the state. Since Montana has never taken a school over, no data was reported in this section. However, after clarification from Kristen Benney at Westat, we have provided state personnel data that we believe falls within the definition.
